

# ELENA programme

Take advantage of our discounted energy and subsidy consulting offer for the reconstruction of non-residential buildings and modernisation of production technologies **with a 90% discount**.

## Programme benefits

-  90% discount on the preparation of supported energy saving projects
-  Combined with the subsidy, it is 30-65% of project costs according to the subsidy programme
-  Offer of discounted financing – green loan or investment loan for sustainable projects

## What is the ELENA programme?

- The ELENA programme offers clients a comprehensive advisory service and follow-up financing for investments aimed at energy savings in commercial buildings and production technologies.
- You will get a 90% discount on consultancy services, which include energy consultancy (energy assessments, PENB, concept studies, etc.), proposal for the financing of energy saving measures, possible preparation and submission of subsidy applications, and for EPC projects also the facilitation of the tender for ESCO supplier.

## How does the ELENA programme work?

- The Programme is intended for medium and large enterprises with up to 3 000 employees and for the public sector without limitations.
- The pre-condition for obtaining the discount is the demonstration of energy savings and the implementation of the investment until March 2027. For public entities the launch of a tender for the supplier according to the Public Procurement Act is the pre-condition.

## Examples of supported projects

### Replacement of technologies

- Acquisition of any machine that demonstrates energy savings compared to the original equipment, e.g. injection moulding machines, CNC machining centres, lathes, milling machines, presses, etc.

### Renovation of buildings

- Thermal insulation of shell, roofs, floors
- Windows and doors
- Lighting
- Heating systems and boilers
- Air-handling systems
- Electrical wiring
- Listed buildings

### EPC projects

- Energy saving projects with guaranteed savings that are paid back from the savings achieved.
- Intended for public administration (especially hospitals, schools) but also for private entities.

### Renewable energy sources

- Photovoltaic systems and solar collectors
- Other renewable energy sources and battery storage if connected to an existing building.

To sign up to the Programme, please contact your bank advisor or **KB EU Point** specialist.
