

# ELENA Programme

Take advantage of a 90% discount on energy and subsidy consulting services for building reconstruction and production technology upgrade projects.

## Advantages offered by the programme

-  90% discount on the preparation of energy efficiency projects
-  30% minimum energy savings per project
-  30–65% subsidy based on the applicant, project type, and subsidy programme

## What is ELENA?

- ✓ ELENA is a programme offering clients all-inclusive consulting services and subsequent financing for investments into energy efficiency projects involving commercial buildings and production technologies.
- ✓ ELENA offers a 90% discount on consulting services that include energy savings, financing for energy efficiency projects, subsidy application preparation and submission, including enclosures and documentation, and selection of the contractor through an invitation to bid – ESCO Company.
- ✓ Consulting services are complemented with a financing offer – loan, green loan, investment loan for sustainable projects.
- ✓ Subsidized projects include investments into improving the energy efficiency of existing buildings, such as thermal insulation, high efficiency heating, ventilation and air-conditioning systems, high efficiency lighting, renewable energy sources linked to buildings (photovoltaic, biomass, and solar collector systems), and investments aimed at reducing the energy intensity of production and technological processes.

## How does ELENA work?

- ✓ The programme is intended for medium and large enterprises with up to 3,000 employees and for the public sector.
- ✓ To obtain the discount, the investment project must be executed no later than in March 2027.
- ✓ The minimum amount of investment costs is CZK 10 million.
- ✓ To take part in the programme, contact your relationship manager or a **KB EU Point** expert.
